Course Overview

- ★ **Duration:** 2 Months (Mon–Sat, 1 hr/day)
- ★ **Eligibility:** Any graduate with basic SQL and PL/SQL, fundamental database knowledge, and basic web concepts.
- ★ **Application Access** will be provided
- ★ **Learning Portal Access** - 2 Years
- ★ **Official Completion Certificate**

Join multiple batches within 1 year at no extra cost.

Access daily live class recordings anytime from our learning portal for 2 years.

Who Can Join This Course

Open to All Graduates

Suitable for graduates from computer science and IT streams.

Basic Technical Knowledge

Requires basic SQL, PL/SQL, and web concepts for learning.

Developers & DBAs

Ideal for developers or DBAs moving into low-code APEX roles.

ERP & Fusion Users

Perfect for ERP or Fusion professionals who want to build APEX apps.

Learning Resources

Access to materials, case studies, and assignments for learning.

Expert Training

Training provided by real-time experts in the field.

Mentorship

One-on-one sessions with industry mentors for guidance.

Student Support

Dedicated student manager to assist with course-related queries.

Placement Assistance

Assured placement assistance to help students find jobs.

Hands-on Training

Practical training with doubt clarification sessions for better understanding.

Limited Strength

Limited number of students to ensure personalized attention.

Career Guidance

Resume and interview preparation guidance for career advancement.

Expertly Curated

Course is curated by subject matter experts for quality.

Teaching - Our Expertise

1

Over 23 years of experience in Oracle APEX and Database.

Experienced Trainers

2

Career guidance, resume reviews, and interview preparation.

Practical Mentorship

3

Training aligned with Oracle APEX Developer Consultant & Low-Code Specialist roles.

Job-Focused Training

4

Sample questions, exam guidance, and expert mentoring for certifications.

Certification Support

Pattern - Learning Flow

Live Instructor-Led Classes

Daily interactive sessions with expert trainers

Weekly Assessments

Evaluate understanding with quizzes & scenario-based tasks

Capstone Project

Apply everything learned to real-life Oracle APEX application implementation projects.

Continuous Support

Doubt-clearing sessions + peer WhatsApp groups

Facilities - What You Get Access To

Learning Management System

Access recorded sessions, assignments, and track progress.

Cloud Instance Access

Practice anytime, anywhere with 24/7 cloud access.

Mobile App Access

Learn on the go with our mobile-friendly LMS.

Exclusive Study Material

Soft copies, flowcharts, and real implementation documents.

What Will You Learn in Our Oracle Fusion Technical Training ?

Modules Covered In this course

Application Builder

Simplifies application creation with a drag-and-drop interface.

Forms in APEX

Facilitates the design and implementation of data entry forms.

Interactive Grids

Enhances user engagement with real-time data manipulation

Interactive Reports

Creates dynamic and interactive data reports.

SQL Workshop

Provides a platform for writing and testing SQL queries.

Shared Components

Promotes code reuse and consistency across applications.

Query Builder

Helps construct SQL queries visually without coding.

APEX Theme

Customizes the visual appearance of applications.

Object Browser

Allows exploration and management of database objects.

Scheduled Automations

Optimizes workflows by executing tasks at intervals

APEX Security

Ensures application security through various measures.

Dynamic Actions

Ensures a seamless user experience with immediate responses

REST Services

Streamlines data retrieval and updates

Database Objects

Manages and organizes database elements.

Validation Processes

Guarantees data integrity and accuracy

SQL Commands

Enables direct execution of SQL commands.

Page Designer

Provides a cohesive and interactive user interface

Packaging & Deployment

Streamlines the process of deploying applications.

Trainer Details

Eshwar

23Yrs+ of Expertise

Oracle APEX Technical Expertise

Mr. Eshwar has deep knowledge and hands-on experience in Oracle APEX, Oracle Database, and Oracle Cloud.

Training Excellence

Known for simplifying complex technical topics into practical, real-time APEX learning for professionals.

Eshwar has 23+ years of experience in corporate and professional Oracle development training.

Certification

Oracle APEX Certified Professional
Specialist in Low-Code Application Development.

Impact

Successfully trained 5,000+ students & corporate teams across leading IT organizations.

Know Your Trainer

Mr. Eshwar brings 23+ years of corporate and training experience in Oracle APEX and Database development. Renowned for his practical approach, he simplifies complex APEX concepts in Application Builder, SQL Workshop, and integrations. His sessions combine real-time project exposure with strong technical depth, helping students gain hands-on expertise and industry confidence.

Basic to Advance Level Training

10+ Modules

50+hrs Training

7+ Assessments

Module 1: Introduction to Oracle Application Express (APEX)

- ✔ What is Oracle Application Express (APEX)
- ✔ APEX architecture
- ✔ Understanding APEX roles
- ✔ Logging in to APEX

Module 2: APEX Demonstration Application

- ✔ Creating and logging into an APEX workspace
- ✔ Installation of APEX & demonstration application
- ✔ Running the APEX demonstration application

Module 3: APEX Application Builder Concepts

- ✔ Page processing and rendering in APEX
- ✔ APEX session management
- ✔ Substitution strings & URL syntax in APEX

Module 4: Using SQL Workshop in APEX

- ✔ Using Object Browser to view objects in APEX
- ✔ Creating, editing and dropping database objects in APEX
- ✔ Using SQL Commands to interact with the database in APEX
- ✔ Using SQL Scripts (create/edit/delete/run) in APEX
- ✔ Query Builder – building queries graphically

Module 5: Building an Application in Oracle APEX

- ✔ Creating an application from the wizard
- ✔ Creating an application from scratch in APEX
- ✔ Creating an application from a spreadsheet in APEX

Module 6: Understanding Pages and Regions in APEX

- ✔ What is a “Page” in APEX
- ✔ Controls on an APEX page
- ✔ Different sections of a page
- ✔ Page rendering & page processing
- ✔ Shared components in APEX
- ✔ Attributes of an APEX page & region

Module 7: Creating Interactive Reports in APEX

- ✔ Building interactive reports
- ✔ Interactive report attributes (columns, behaviours)

Module 8: Creating SQL Reports in APEX

- ✓ Building SQL-based reports
- ✓ SQL report attributes (columns, layout)

Module 9: Creating Forms in APEX

- ✓ Creating forms with reports in APEX
- ✓ Simple forms
- ✓ Tabular forms
- ✓ Master-detail forms
- ✓ Using wizards & manual methods for forms

Module 10: Interactive Grids in APEX

- ✓ Interactive Grid basics
- ✓ Editing, validations & actions
- ✓ Toolbar, filters & interactive features
- ✓ IG events & dynamic behavior

Module 11: Working with Items & Buttons in Oracle APEX

- ✓ Types of items (Text, Text Area, Checkbox, Select List, Radio Group, etc.)
- ✓ Creating buttons in APEX
- ✓ Navigation: Tabs, Lists, Breadcrumbs, Navigation Bar
- ✓ List of Values (LOV) and other controls

Module 12: Dynamic Actions in APEX

- ✓ Event-driven actions
- ✓ Show/Hide, Refresh & Set Value actions
- ✓ Cascading LOVs & conditional UI
- ✓ JavaScript integration through Dynamic Actions

Module 13: Oracle APEX Shared Components

- ✓ Understanding shared components
- ✓ Using shared components across pages/regions

Module 14: Page Processing in APEX

- ✓ Thorough overview of page rendering & processing sections
- ✓ Computations, validations, processes, branches in APEX

Module 15: REST APIs & ORDS

- ✓ Consuming REST APIs
- ✓ Creating REST Services with ORDS
- ✓ Web Source Modules
- ✓ Fusion ERP REST API basics

Module 16: Automations in APEX

- ✓ Creating Automations
- ✓ Email alerts & notifications
- ✓ Background tasks & data processing
- ✓ Monitoring automation logs

Module 17: Oracle APEX Security

- ✓ Managing application security in APEX
- ✓ Authentication options in APEX
- ✓ Creating custom authentication
- ✓ Switching authentication methods
- ✓ Authorization schemes: creating, attaching to pages/regions/tabs

Module 18: Redwood UI Customization

- ✓ Redwood templates & layout
- ✓ Template options & responsive UI
- ✓ Theme Roller customization
- ✓ Modernizing pages using Redwood UX

Module 19: Performance Tuning

- ✓ SQL tuning basics
- ✓ Page performance optimization
- ✓ Caching, indexing & session state control
- ✓ Debugging slow pages & queries

Module 20: Packaging & Deploying Application

- ✓ Deployment options in APEX
- ✓ Packaging applications along with supporting objects
- ✓ Deploying applications from one environment to another

What Our Students Say

Google
Rated 4.8/5 (1000+)

“

Very professional and detailed training provided by the instructor. Helps to get a clear understanding of the concepts even for freshers. Thanks for the wonderful program. Coming from a cross platform, this training helped to understand from the basics

Hema Kuar
Student

“

TechLeads IT provided a good learning environment with helpful guidance and practical training. It was a valuable experience for building my skills.

Prakash
Fresher

“

Explanation is very good with real time scenarios. The trainer has got clear vision of the course. We have a great flexibility to classes as we have recorded classes which is great for professionals.

Divya Madhavi
Student

“

The trainer never rushed the sessions. He made sure everyone understood each topic completely before moving on. That really helped me learn better and also Provided the Practice instance and Daily session recordings

Naveen
Student

“

I've had a great experience
I've had a great experience with this course overall. The quality of the classes is excellent—well-structured, informative, and easy to follow. One of the things I really appreciated was that the recordings were shared every day, which made it easy to catch up if I missed anything or wanted to review the practice.

Athi Narayan
Fresher

“

I recently completed my course from Tech Leads IT and had a great learning experience. The training was clear, practical, and well-organized. The support team and trainers were very helpful throughout. I'd definitely recommend Tech Leads IT to anyone looking to upskill.
