From Training to Placement

Untrained Student

Lacking skills and confidence

Expert Training

Real-time trainers build skills

Placement Support

Resume, profile, and interview prep

Mock Interviews

Practice and feedback for confidence

Placed Professional

Confident and skilled professional

Course Overview

- ★ Duration: 3 Months (Mon–Sat, 1 hr/day)
- ★ Eligibility: Any Graduate (No pre-requisites)
- ★ Application Access: 6 Months
- ★ Learning Portal Access - 2 Years
- ★ Official Completion Certificate

Join multiple batches within 1 year at no extra cost.

Access daily live class recordings anytime from our learning portal for 2 years.

Who Can Join This Course

Open to All Graduates

Suitable for graduates from various disciplines.

No Coding Required

Oracle Fusion SCM can be learned without coding.

ERP Professionals

Suitable for professionals looking to upskill in Manufacturing, Planning & Quality modules.

EBS to Fusion

Ideal for those upgrading from EBS to Fusion.

Learning Resources

Access to materials, case studies, and assignments for learning.

Expert Training

Training provided by real-time experts in the field.

Mentorship

One-on-one sessions with industry mentors for guidance.

Student Support

Dedicated student manager to assist with course-related queries.

Placement Assistance

Assured placement assistance to help students find jobs.

Hands-on Training

Practical training with doubt clarification sessions for better understanding.

Limited Strength

Limited number of students to ensure personalized attention.

Career Guidance

Resume and interview preparation guidance for career advancement.

Expertly Curated

Course is curated by subject matter experts for quality.

Teaching - Our Expertise

1

Over 22 years of experience in Oracle Manufacturing, Planning & Quality implementations.

Experienced Trainers

2

Career guidance, resume reviews, and interview preparation.

Practical Mentorship

3

Training aligned with Oracle Fusion Manufacturing & Quality roles.

Job-Focused Training

4

Sample questions, exam guidance, and expert mentoring for certifications.

Certification Support

Pattern - Learning Flow

Live Instructor-Led Classes

Daily interactive sessions with expert trainers

Weekly Assessments

Evaluate understanding with quizzes & scenario-based tasks

Capstone Project

Apply everything learned to a real-life implementation scenarios

Continuous Support

Doubt-clearing sessions + peer WhatsApp groups

Facilities - What You Get Access To

Learning Management System

Access recorded sessions, assignments, and track progress.

Cloud Instance Access

Practice anytime, anywhere with 24/7 cloud access.

Mobile App Access

Learn on the go with our mobile-friendly LMS.

Exclusive Study Material

Soft copies, flowcharts, and real implementation documents.

What Will You Learn in Our Oracle Fusion Manufacturing, Planning & Quality Training ?

Modules covered in this course

Product Management

Streamlining product lifecycle from planning to commercialization

Inventory Management

Overseeing stock levels and storage

Discrete Manufacturing

Overseeing shop floor operations and production activities.

Process Manufacturing

Managing formulas, batches, and quality of process industries.

Costing

Defining cost structures for Standard and Average methods.

Planning Central

Balancing demand and supply across manufacturing operations.

Quality Management

Ensuring inspection, compliance, and quality control standards.

Trainer Details

Santhosh
Oracle Fusion Expert

Oracle Fusion Manufacturing Expertise

Mr. Santhosh has deep knowledge and experience in Oracle Fusion Manufacturing, Planning & Quality modules.

Training Excellence

Santhosh's ability to effectively train and mentor students in Oracle Fusion Manufacturing.

Experience

Santhosh has 22+ years of experience in Oracle ERP and Fusion Manufacturing training.

Certification

Oracle Fusion Manufacturing Certified Professional.

Impact

Successfully trained over 4,000+ students in Oracle Fusion Manufacturing & Planning courses.

Basic to Advance Level Training

7+ Modules

80+hrs Training

5+ Assessments

Module 1: Introduction to Oracle Cloud

- ✓ SAAS, PAAS and IAAS Overview
- ✓ Oracle SCM Cloud Capabilities: Overview
- ✓ Navigation Basics
- ✓ Resources

Module 2: Intro to Functional Setup Manager and Quick Setup

- ✓ Implementation Planning
- ✓ Roles and Responsibilities
- ✓ Offerings
- ✓ Implementation Considerations
- ✓ SCM Simplified Setup: Overview
- ✓ Automated Setup of SCM Common Components
- ✓ Simplified Setup: Time Savings
- ✓ Best Practices

Module 3: Enterprise Structure Overview

- ✓ Walkthrough on Enterprise Structure
- ✓ Differentiate E-Business Suite and Cloud Org Structure
- ✓ Business Unit Overview
- ✓ Business Unit Implementation

Module 4: Demo on Connected Modules

- ✔ Fusion Product Data Hub
- ✔ Fusion Inventory Management and Costing
- ✔ Fusion Manufacturing
- ✔ Fusion Procurement
- ✔ Fusion Order Management

Module 5: Oracle Supply Chain Management Cloud Common Configuration

- ✔ Set up an Inventory Organization
- ✔ Describe Units of Measure
- ✔ Describe Calendars
- ✔ Manage Inventory, including Issue and transfer of materials

Module 6: Manage Items & Item Structures

- ✔ Describe Item attributes that are critical to Oracle Manufacturing Cloud
- ✔ Create Items
- ✔ Create Item Structures and attributes that are critical to Oracle Manufacturing Cloud

Module 7: Manage Work Orders

- ✔ Explain Work Execution Work Areas
- ✔ Create and update Work Orders for standard and non-standard Work Orders and Serialized Manufacturing
- ✔ Explain Work Order Reservations and History

Module 8: Reporting and Analytics for Manufacturing

- ✔ Execute Work Definition and Work Order reports, including Component Lists, Work Order traveler, and Labels
- ✔ Set up Product Task Reporting
- ✔ Set up BI and Reporting
- ✔ Explain OTBI Metrics
- ✔ Explain Reporting customization

Module 9: Manufacturing Set Up

- ✔ Describe Function Set Up Manager and Simplified Set Up
- ✔ Set up Product Resources and Standard Operations
- ✔ Explain how to set up Plant, Plant Parameters, and Plant Security
- ✔ Explain how to set up Profile Options, Look Ups, and Descriptive Flexfields
- ✔ Describe Import and Export Services for setup data
- ✔ Define Standard Operations
- ✔ Describe Work Centers set up
- ✔ Manage Production Calendars and add Shift and Work Center Resource exceptions
- ✔ Describe Product Resources and Standard Operations setup

Module 10: Manage Work Definitions

- ✔ Describe Work Definitions, Work Definition Names, and Library
- ✔ Create and update Work Definitions, including spreadsheets
- ✔ Describe Manufacturing Lead-time
- ✔ Process Item Structure changes
- ✔ Describe Work Definition versions
- ✔ Create Visual Work Definitions
- ✔ Import Work Definitions
- ✔ Describe how to work definition is automatically generated

Module 11: Execute Production

- ✔ Describe Production Execution transactions
- ✔ Explain a Dispatch List
- ✔ Report Production Transactions
- ✔ Report Orderless Transactions
- ✔ Explain a Production Transactions Review
- ✔ Transfer Production Transactions to Costing
- ✔ Describe Import Production Transactions
- ✔ Explain Close Work Orders
- ✔ Create manufacturing Production Exceptions, including raising exceptions and managing and resolving exceptions
- ✔ Supply Types of Components (Push, Assembly Pull, Operation Pull, Bulk, Supplier)
- ✔ Operation Types (Cutting Point, Auto Transact, Optional Operations)
- ✔ Operation Work Order Scheduling and type (Backward, Forward Scheduling and Mid Point Scheduling)
- ✔ Work Order Types (Standard, Non Standard, Rework and Transform work order) and Orderless transactions
- ✔ Work Order Reservation
- ✔ Genealogy Tracking
- ✔ Derivation of Lead Time (Processing Lead Time, Fixed Lead Time, Variable Lead Time, Cumulative Manufacturing Lead Time, Cumulative Total Lead Time)
- ✔ Process Manufacturing
- ✔ Process Manufacturing - Work Definitions
- ✔ Process Manufacturing - Work Order Cycle
- ✔ Process Manufacturing - Co product and By product
- ✔ Process Manufacturing - Scaling
- ✔ Work Order Pick Slip generation

Module 12: Costing and Inventory Foundations

- ✔ Explain Common Inventory Configurations
- ✔ Describe Managerial Accounting Basics
- ✔ Explain Cost Accounting

Module 13: Manufacturing Costing

- ✔ Describe Manufacturing Costing
- ✔ Compute Production Costs
- ✔ Evaluate a Work Order completion cost, including Partial and Scrap
- ✔ Explain Cost Reporting, including WIP Inventory Valuation Report Set up and implement Cost Planning estimates

Module 14: Oracle Planning Central Cloud Overview

- ✔ Describe different types of Planning Business Flows
- ✔ Create and manage Page Layouts
- ✔ Manage the Plan Summary Layout
- ✔ Manage Tables and Graphs
- ✔ Create Info tiles and Tile Sets
- ✔ Manage Material Planners
- ✔ Describe Administer Planning Security

Module 15: Manage Planning Profile Options

- ✔ Describe Manufacturing Costing
- ✔ Manage Creating, Copying and Viewing a Supply Plan
- ✔ Apply Supply Plan options (Advanced Options)
- ✔ Configure Safety Stock Plan options
- ✔ Evaluate Supply Plan inputs
- ✔ Perform Running Supply Plan
- ✔ Describe Supply Planning Concepts
- ✔ Develop Modelling and Analyzing Supply Plan
- ✔ Manage Release Recommendations (Requisition Creation and Approval and Transfer order)
- ✔ Analyze Demand Fulfillment

Module 16: Data Collections

- ✔ Manage Data Collection from the Oracle Fusion Source System
- ✔ Explain Loading Planning Data from Files
- ✔ Analyze Collected Data in the Planning Data Repository
- ✔ Program Order– Collection and Refresh
- ✔ Dimensions and Hierarchies
- ✔ Measures and Measure Catalogs
- ✔ Creation of Measures and Functions of Measures
- ✔ Expressions in Measures

Module 17: Exceptions

- ✔ Configure Exceptions and Exception Sets
- ✔ Analyze Exceptions in Plans

Module 18: Measure

- ✔ Creation of Measures
- ✔ Measure catalog
- ✔ Assigning Measures to measure catalog
- ✔ Loading Measure Data
- ✔ Review of seeded measures

Module 19: Supply Planning Functions

- ✔ Lead Time Calculations with respect to suggested dates
- ✔ Release of Planned Orders
- ✔ Release of Reschedules from planning
- ✔ MPS and MRP Planning
- ✔ Unconstrained and Constrained Supply Plan
- ✔ Forecast Consumption
- ✔ Forecast Spreading
- ✔ Loading Planning data through FBDI
- ✔ Time Fences
- ✔ Forecast Consumption and Spreading
- ✔ Calendars consideration in supply planning
- ✔ Tables supply planning
- ✔ Supplies and Demands
- ✔ Material Plan
- ✔ Build Plan
- ✔ Demand Fulfillment
- ✔ EDD (Enforced Demand Due dates)
- ✔ ECC (Enforced capacity Constraints)
- ✔ ECC for limited days
- ✔ Natural Time Fence
- ✔ Forecast Consumption
- ✔ Forecast Spreading
- ✔ Past due supply and demand consideration in plan
- ✔ Decision Rules
- ✔ Alternate Work definitions
- ✔ Alternate sourcing
- ✔ Allocation Split in Sourcing
- ✔ Rank based Sourcing
- ✔ Alternate Resources
- ✔ Substitute Components
- ✔ Bill of Distribution
- ✔ Lead Time and Suggested Dates in planning
- ✔ Calendar considerations in Planning

Module 20: Simulations

- ✔ Evaluate Demand/Supply Changes
- ✔ Execute Simulations

Module 21: Demand Management

- ✔ Configure a Demand Plan
- ✔ Perform a Run and Manage Demand Plan
- ✔ Apply Forecasting Methods and Causal Factors
- ✔ Describe Override Demand Forecast and Plan Approval
- ✔ Explain Disaggregation Parameters and Conditional Formatting

Module 22: Supply Network Model

- ✔ Explain Supply Network Model
- ✔ View Approved Supplier List
- ✔ Create Assignment Sets, Sourcing Rules, and Bills of Distribution
- ✔ Apply Item Attributes for Supply Planning

Module 23: Quality Planning

- ✔ Define quality models, standards, and criteria.
- ✔ Configure inspection plans and test methods.
- ✔ Establish sampling plans for incoming, in-process, and outgoing materials.

Module 24: Quality Inspection

- ✔ Perform incoming material inspections.
- ✔ In-process quality checks during manufacturing.
- ✔ Outgoing product inspections before shipment.
- ✔ Mobile & handheld device-based inspection entry.

Module 25: Quality Results & Data Collection

- ✔ Capture inspection results (manual/automated).
- ✔ Use control charts and statistical process control (SPC).
- ✔ Manage measurement units, limits, and tolerances.

Module 26: Quality Issues & Non-Conformance Management

- ✔ Record and track quality issues.
- ✔ Manage deviations and concessions.
- ✔ Root cause analysis and containment actions.

Module 27: Corrective and Preventive Action (CAPA)

- ✔ Define and manage corrective actions.
- ✔ Assign ownership and monitor effectiveness.
- ✔ Prevent recurrence with continuous improvement.

Module 28: Quality Workflows & Approvals

- ✔ Automated workflows for inspection approvals.
- ✔ Role-based access control.
- ✔ Integration with notifications and escalations.

Module 29: Reporting & Analytics

- ✔ Quality dashboards (defects, issues, resolutions).
- ✔ Real-time analytics with OTBI.
- ✔ Compliance and audit reporting

Module 30: Integration with other Modules

- ✔ Procurement: Supplier quality checks.
- ✔ Inventory: Stock disposition based on quality results.
- ✔ Manufacturing: In-process inspections.

What Our Students Say

Google
Rated 4.8/5 (982)

“

I recently completed my Oracle fusion manufacturing training at Tech Leads IT and I would say it was an outstanding experience. The instructor are extremely knowledgeable in Oracle ERP with real time experience, and brings real time industry experience into the classroom. This made complex topics much easier to understand.

H

Hari Kasula
Student

“

Tech leads IT is amazing for all skill levels — from complete beginners to advanced learners. The instructors are supportive, knowledgeable, and make learning easy and enjoyable, Whether you're just starting out or looking to grow further, this is the perfect place to learn as they are providing mobile apps also.

J

Juned Shaik
Student

“

The Oracle Fusion sessions delivered by TechLeads IT have been truly exceptional. Each module is thoughtfully curated and aligns perfectly with real-world scenarios we face in day-to-day operations. The trainer deserves special recognition for his methodical and approachable teaching style — breaking down complex concepts into structured, easy-to-follow insights that resonate with our practical needs.

A

Amit Sen
Student

“

I have taken Oracle Fusion Manufacturing Training and would like to give all credit to the trainer to help me understand the concepts, the training was well organized, coordinated and very helpful in my career advancement and will recommend this to anyone interested.

S

Surender
Student

“

Am from Oracle Manufacturing batch. As a beginner am able to follow with the modules clearly. Santhosh Sir is an awesome trainer, and he is very accountable and responsible, and he expects the same with the trainees by motivating us and also, he explains all the topics in a clear way. Thank you very much SIR
